Specification document of S-58LM20A

Component manufacturer	ABLIC
Model number	S-58LM20A
Datasheets	S-58LM20A Series TEMPERATURE SENSOR IC (ablic.com)
Specification Ver	01.00.00 Sep 12,2022 New release
Documentation provided	Rui Long Lab Inc. https://rui-long-lab.com/

1. Component Software IF specification

The software interface specifications based on the S-58LM20A component specifications are as follows.

The voltage value-to-physical value conversion equation is a linear conversion equation as shown in the equation below.

ADC value to voltage value conversion formula

$$vi = (ai \times iADC\_vdd) / 2^{iADC\_bit} \quad [V]$$

Voltage value to physical value conversion formula

$$y = (vi - iS58LM20A\_xoff) / iS58LM20A\_gain + iS58LM20A\_yoff \quad [℃]$$

$$iS58LM20A\_min \leqq y \leqq iS58LM20A\_max$$

ai	A/D conversion value
vi	Sensor output voltage value [V]
iADC_vdd	Sensor supply voltage value [V]
iADC_bit	A/D conversion bit length
y	Temperature value [℃]

```
#define iS58LM20A_xoff      ( 0.561111F*iADC_vdd )    // X offset [V]
#define iS58LM20A_yoff      30.0F                     // Y offset [℃]
#define iS58LM20A_gain      ( -0.00436F*iADC_vdd )    // Gain [V/℃]
#define iS58LM20A_max       130.0F                    // Temperature Max [℃]
#define iS58LM20A_min       -30.0F                    // Temperature Min [℃]
```
